

REMOTE INDICATORS

A range of visual and/or audible indicators for applications such as filter monitoring, airflow monitoring etc.

Filter monitoring indicators

Indicators that when used in conjunction with a filter differential pressure switch give an indication of the filter condition I.E. clean/dirty.

Airflow monitoring indicators

Indicators that when used in conjunction with a filter differential pressure or airflow paddle switch give an indication of the airflow presence and/or loss.

Damper motor position indicators

Indicators that when used in conjunction with a damper motor that has an auxiliary switch can be used to display the status of the damper I.E. open or closed

FDI1, FF11

FFI2, FDI2, DI2

FFI3

DI1

Filter monitoring indicators

Model no	Indicator Voltage	Size (H x W x D*)	Lamp marking & (colour)
FDI1	230v ac	70mm x 70mm x 70mm	Filter dirty (Red)
FDI2	230v ac	70mm x 115mm x 70mm	Filter clean (green) & filter dirty (red)

Airflow monitoring indicators

Model no	Indicator Voltage	Size (H x W x D*)	Lamp marking & (colour)
FFI1	230v ac	70mm x 70mm x 70mm	No airflow (Red)
FFI2	230v ac	70mm x 115mm x 70mm	Airflow(green) & No Airflow (red)
FFI3	230v ac	70mm x 70mm x 70mm	No Airflow (combined red lamp & buzzer)

Damper motor position indicators

Model no	Indicator Voltage	Size (H x W x D*)	Lamp marking & (colour)
DI1	230v ac	70mm x 70mm x 70mm	Damper open (Green)
DI2	230v ac	70mm x 115mm x 70mm	Damper open (green) & Damp closed (red)

*Depth includes lamp

If you require a visual and/or audible indicator for something not listed above please enquire.

Low voltage (24v) versions also available.
